# SPA2 D GREEN | UV

SMART | RELIABLE | CUTTING-EDGE

SPA2 D diode pumped solid state lasers are widely used in packaged goods applications including bottles, tubs and liquid dispensers. They are typically used to code plastic substrates (excluding PET and PVC).

- UV and Green wavelength options enable challenging substrates to be coded and for marking plastics with minimal thermal impacts.
- Ideal for marking delicate substrates and for laser coating ablation.
- DUO dual processor technology enables high-speed and high-quality printing with variable data.
- 10.1-inch touch screen controller with context sensitive HELP and on-line instruction videos.
- Protection enclosure is available for washdown (IP65) environments.

## Why Macsa id?

Macsa id is one of the 4 leading companies in the world in coding and marking lasers. It offers the widest range of lasers to code and mark both in the productive sectors (food, beverages, pharmaceutical, healthcare, cosmetics ...) as well as in the industrial ones (industry, automotive, aeronautics, defense, construction materials ...).

Macsa id is recognized as a world leader in technological innovation in lasers for marking and coding. The company invests more than 10% of its turnover in R&D every year.

Macsa id  
in more than  
80 countries

- MACSA Headquarters
- MACSA Branch Offices
- MACSA Distributors
- MACSA JV

The most complete range of CO2, Fiber and DPSS lasers on the market

### CO2

Available from 10 to 450W

#### PRECISION

Several features including Macsa's proprietary VCS to ensure high print quality even on high-speed production lines.

#### ADAPTABILITY

Wide range of essential and extra accessories to optimise the laser's performance.

### Fiber

From 20W to 200W

#### VERSATILITY

Integrated into any production line, it can encode over a wide range of materials using 3D printing options.

#### SIMPLICITY

Videos and support material to facilitate its installation and integration.

### Fiber Film

From 20W to 100W

#### RELIABILITY

Production environments can test the reliability of laser systems. SPA2 lasers are designed to operate reliably in dusty or damp environments even when subject to extreme temperatures.

#### CONNECTIVITY

The lasers include the TCP/IP protocol in order to have complete control of the system from most standard communications. The new SPA2 platform includes the integration of the most widely used industrial communication protocols such as Profinet and OPC-UA. These are both available in all models upon request.

## SOFTWARE AND SERVICES

Maintaining Service

Equipment performance

### MONITORING AND PREDICTIVE MAINTENANCE

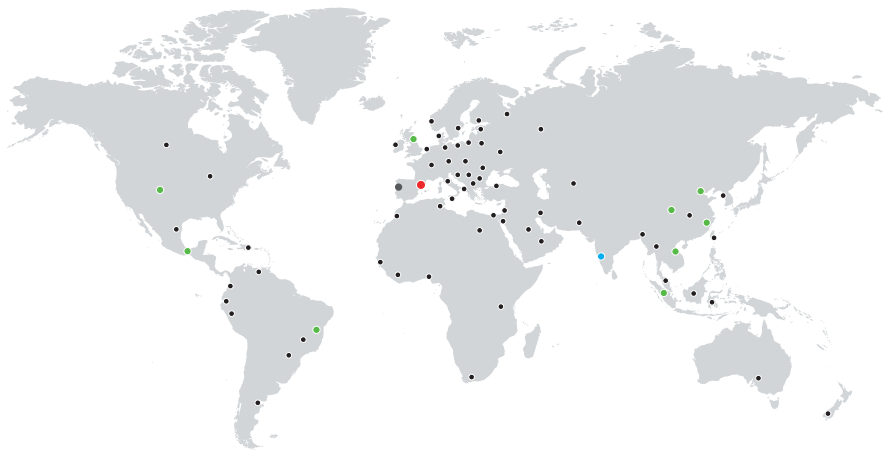

From any place and at any time, data is provided in real time to increase productivity, improve efficiency and reduce downtime. It allows monitoring of the status of the equipment from any remote device which can allow the reception of alerts. IntegraNET allows our service engineers to receive Diagnostics in real time to detect problems before they occur and prevent expensive downtimes.

### REMOTE ASSISTANCE

IntegraNET allows field technicians and Macsa id engineers to interconnect and exchange information through video calls.

### INCREASED EFFICIENCY

The collected data is integrated with the different software of Macsa id modules for production management, traceability and efficiency of the production lines.

#### NO CONSUMABLES

A clean technology that does not produce waste.

#### ENVIRONMENT FRIENDLY

No harmful emissions are generated, thus benefitting the work environment and the planet.

#### CLEAN

For a cleaner and healthier workspace.

#### ENERGY EFFICIENT

Maximum quality and coding speed with just the right amount of energy.
